| **DeanHouston** | **Lead Full Stack Developer** |
|---|---|
| *May 2016 - Present* | *Orland Park, IL* |

Large marketing and design company with locations in Chicago, Cincinnati, Las Angels and Shang Hi China. Leader in the B2B industrial market for product design and website development. I am in charge of all development for the Chicago branch and managed junior developers to maintain team development best practices while building using the latest technologies.

• Developed API integrations and tools to bridge the gap between a client's CRM and other data resources.

• Built and manage 15 AWS Load Balanced EC2 servers. While also maintaining 6 RDS database structures and several cloud watch services to ensure optimal performance.

• Built several custom JavaScript applications that business use to manage clients, distributors, regional sales managers and much more. Was also in charge of developing an education module for clients to take digital quizzes and get certificates of completion. All of the data from these education modules would be used for analytics reporting for the business owner.

• Developed an internal strategy for custom e-blast development using Foundation and Node JS.

• Custom developed CMS templates and services to create very functional and simple to use interfaces for website development and management.

• Streamlined our companies Git Repository and deployment process to ensure optimal agile development best practices.

**690 N. First St., Coal City, IL 60416 • tylerjjones09@gmail.com**

**Script Fusion Development Services**                                         **Owner**
*January 2015 - May 2016*                                                  *Coal City, IL*

Small development firm I developed, primarly focusing on the education, law and medical fields. Worked directly with clients and negotiated bids as well as custom developed sites.

**K12 Teachers Alliance**                              **Manager of Digital Development**
*March 2012 - December 2014*                                            *Frankfort, IL*

Developed and maintained a teacher focused education website that averaged 700+ visitors a day. Worked with my development team to continuously update and manage the site via Git repositories and AWS hosting platform. Built custom PHP applications to support registrations and other interactive features.

**The Gammon Group**                                                    **Lead Developer**
*August 2010 - Feb 2012*                                                       *Joliet, IL*

Managed and completed updates for over 70+ clients. Created budgets and met with clients to discuss website functionality and build timeline. Created a custom CMS application that we used to help users develop and maintain their websites. Maintained hosting services for all clients.

**305 Spin**                                                **Database Architect & Developer**
*August 2010 - Feb 2012*                                                    *Sedalia, MO*

Managed and completed updates for over 40+. Developed database structures for military clients and other heavily data driven clients. Assisted in spearheading PHP/WordPress indicatives. Helped create custom built CMS tools and shopping solutions.

**Missouri State Treasurers Office**                                  **Front End Developer**
*March 2008 - July 2010*                                               *Jefferson City, MO*

Maintained the Missouri State Treasurers website. Was tasked with converting all original .asp pages to .aspx and templatizing them. Work with back end developers to create custom kiosks that would search unclaimed property. Designed digital adds that were used for adwords marketing.
